SKILLS

- **Programming**: Java, C, Python, JavaScript, TypeScript.
- **Web/Cloud:** React, Next.js, Tailwind CSS, Node.js, Express.js, REST APIs, PostgreSQL (Supabase), MongoDB, Prisma ORM, AWS (S3, CloudFront, RDS), Redis.
- **Other:** Git, GitHub, Socket.IO, Sanity CMS

WORK EXPERIENCE

CaptainSide: *Full-Stack Developer Intern* *December 2024 –Present*

- Engineered a multi-role platform including public client platform, internal admin dashboard, and game developer analytics dashboard.
- Built analytics dashboard for game developers to track game performance, engagement metrics, and platform visibility.
- Designed Redis-based caching strategy for personalized feed APIs, reducing repetitive database queries and improving response latency.
- Architected secure UGC video delivery using AWS S3 + CloudFront with signed cookies for HLS streaming.
- Managed production PostgreSQL (AWS RDS) database, optimized queries and indexing for feed, analytics, and admin operations.
- Developed admin panel with Sanity CMS enabling dynamic management of games, tournaments, quests, and platform content.

PROJECTS

- **Shopy — Full Stack E-Commerce Platform (Shopy)**
  Tech: Next.js, MongoDB, Stripe, NextAuth
  - Developed role-based e-commerce platform with separate admin and user interfaces.
  - Integrated Stripe payment gateway with secure checkout flow and order tracking.
  - Implemented authentication and protected routes using NextAuth for session management.
  - Designed RESTful APIs for product management, order handling, and admin operations.
- **Encrypted Real-Time Chat Application**
  Tech: Next.js, Express.js, Socket.IO, PostgreSQL, Cryptr
  - Built real-time messaging system using Socket.IO with room-based architecture for scalable communication.
  - Implemented end-to-end message encryption using Cryptr before database persistence.
  - Designed message storage schema with pagination and read-receipt tracking.
  - Developed online user presence tracking and deployed separate WebSocket server for real-time communication.

EDUCATION

Dayanand Sagar University

August 2024 – Present *CGPA:* 8.39

Bachelor of Technology (B.Tech) in Computer Science Engineering

ACHIEVEMENTS

- **Captain Side Hackathon (Winner) –** Built a full-stack web platform and won the company-organized competition. (Certificate)

- **Team1 India Hackathon 2025 (4th Place – $300 Prize) –** Organized by *Avalanche* and *Team1*. Developed an innovative **blockchain-based SBT solution**, securing 4th place among nationwide participants.

- **Dev Hacks 6.2 – IIT Dharwad (National-level) –** Selected as a finalist for the pitching round among nationwide participants. (Certificate)
- **TechFlix Hackathon – National-level, College-organized** – Selected as one of the **top 12 teams** for pitching among nationwide participants. (Certificate)
